Minprovisе specialise in:

Site Services; Consultancy, Project Management, Shutdowns and on site/ Off Site Repairs

Mineral Processing Equipment supply, installation and maintenance

Conveyor componentry supply, installation and maintenance

Custom designed Fabrication and Engineering products

On and Off Site Services and Repairs

Minprovisе specialises in providing service and support for crushing and associated equipment.

Summary

MINPROVISE is a leading Australian supplier of rock and minerals processing equipment, fabrication, bulk materials handling equipment, specialised site services, commissioning and maintenance.

MINPROVISE is an experienced vendor to the Mining, Oil & Gas, Construction and Agriculture sectors primarily focused on reducing the risks associated with the supply, installation, maintenance and productivity of mining plant and equipment. We are nationally recognised for our commitment to our customers and provide a complete

service from project management and equipment supply and installation to offsite and onsite repairs and maintenance.

Our ability to retain high quality staff allows us to ensure that highly skilled and experienced personnel are available to resource projects and our tooling, onsite fleet and ancillary equipment, along with our heavy engineering offsite workshops ensure that we are able to deliver our services efficiently and to the highest standard.

Description

Minprovisе specialise in:

Site Services; Consultancy, Project Management, Shutdowns and on site/ Off Site Repairs

Mineral Processing Equipment supply, installation and maintenance

Conveyor componentry supply, installation and maintenance

Custom designed Fabrication and Engineering products

On and Off Site Services and Repairs

Minprovisе specialises in providing service and support for crushing and associated equipment. We have based our facilities, staff, tooling and equipment requirements around these activities, enabling us to provide high levels of safety and quality workmanship. In addition to our field representation and workshop facilities, we also boast a dedicated engineering and design team.

Fully prepared approach to all works as the norm

Focus on procedures, correct manpower and tooling ensure coherence to project timetables, generating

efficiency and minimising workplace risk.

Safe Work Procedures are developed prior to project commencement with all steps and tooling outlined.

Team members involved with tasks perform Job Safety Analysis to identify and eliminate any associated job specific risks prior to commencement

Servicing over 90 installed machines across various mining types and suppliers

Our tooling containers are stocked with a full complement of tools, measuring, rigging, consumables, hardware, laser aligning and safety equipment. This approach has allowed Minprovis to be fully self-sufficient and we pride ourselves on keeping the requirement to utilize tools and equipment from the client to a minimum. Tooling and equipment is regularly inspected ensuring compliance to site and legislative requirements. Our core customer focus is the hard and soft rock crushing equipment.

Mineral Processing Equipment

Minprovis is the Australian and New Zealand distributor for EarthTechnica Co Ltd, a global leader in the manufacture of Mineral Processing, Powder Processing and Recycling equipment. It was established in April 2003 by integrating Kawasaki Heavy Industries and Kobe Steel. Later, the company was fully subsidized by Kawasaki Heavy Industries to become its affiliate company.

Earthtechnica Co Ltd is internationally recognized for their high performance Kawasaki and Kobe Crushers and Minprovis supply install and service the following Crushers:

- Primary and Secondary Gyratory Crusher
- Jaw Crushers
- Cone Crushers
- Impact Crushers

Dugless Conveyor Spillage Cleaning Unit

Minprovis is the global distributor for the remote controlled Dugless Conveyor Spillage Cleaning Unit, an innovative digger that can help prevent unplanned shutdowns due to broken conveyor drives, reduce Lost Time Injuries by reducing the risk to workers and reduces fire hazards caused by the build-up of oily sludge under moving machinery.

The Dugless 900, is specifically designed to safely remove spillage and manoeuvre under low conveyor systems, culverts and other inaccessible places such as drains and pipes without any risk to workers or equipment. In just 12 hours (five day payback period) it is able to recover 300 tonnes of iron ore, therefore achieving a return-on-investment within one month.

Conveyor Components

Minprovis is proud to be associated with Daeyang Rollent conveyor systems and components as Australias authorised agent.

We supply high quality conveyor frames, idlers, complete conveyor systems and accessories.

Minprovis has ensured that roller and frame design are specified and suitable for the arduous Australian Mining industry.

Minprovis Pty Ltd is certified to ISO9001, ISO14001, OHSAS18001 and AS/NZS4801

If its on-site service, off site repairs, products, consultancy or Project Management, you will not be disappointed with the level of efficiency, service and professionalism you will receive from the Minprovis team.

Previous Significant Projects

2017

Silvergrass Gyrotory Crusher
\$5,500,000

Client: Rio Tinto

Supply and Commission the GY54-74 Primary Gyrotory Kawasaki crusher

2015

Conveyor Idler Supply
\$1,000,000

Client: POSCO Mining

Supply 1200mm wide Conveyor idlers and frames for 2.6km long conveyor, 2600 sets in total.

2015

Port Hedland Mobile Feed Hopper Apron Feeders
\$1,000,000

Client: Port Hedland Port Authority

Completely refurbish all the running gear on the 6 apron feeders on the 2 mobile feed hopper trains. Completed in 8 days on site.

2015

Total Plant Shutdown
\$300,000

Client: Rio Tinto Iron Ore

Every 6 weeks Minprovis strips a number of Warman and Krebs slurry pumps and undertake maintenance / refurbishment works at the Hope Downs 4 wet plant. These works have been ongoing since mid 2014.

2014

Rotary Breaker
\$2,000,000

Client: Cook Colliery

Supply a 3.6m diameter x 8.7m long Rotary Breaker and support Structure

2014

Desands Shutdown
\$500,000

Client: Fortescue Metals Group

Warman pumps stripped and refurbished insitu during desands shutdown

Project Value: \$240,000
