Equipment Placement are Support and Maintenance Specialists for the supply and hire of quality equipment and specialized products.

### Summary

Equipment Placement are Support and Maintenance Specialists for the supply and hire of quality equipment and specialized products. We supply all products from our associated partners that provides solutions for maintenance based tasks, which decreases down time of equipment. This enables increased productivity and savings not only in maintenance budgets also extensions in component life cycles.

These include products designed for cleaner and more efficient engine performance, better component lubrication as well as a range of highly durable moulded plastic

products, all specially designed to operate in harsh conditions.

With a solid background in mining and related industries, Equipment Placement staff have the knowledge and experience to give you the right solutions to your problems, from spare parts through fuel filling and filtering, to a range of high quality moulded products.

### Description

Equipment Placement are Support and Maintenance Specialists for the supply and hire of quality equipment and specialized products. We have a range of products and services to add value to your mining, civil and construction operations.

we Sell and Hire; Service trucks, fuel and water carts ranging in size to service Civil, Construction and mining projects and equipment.

We Sell and Hire Lighting Towers with the most up to date LED technology

Equipment Placement can help you to reduce costs and improve efficiency in mobile and fixed plant by filtering oils and fuels effectively. We sell, install and maintain Filtration equipment and systems utilizing Filter Technology Australia filtration products which cover all types of equipment ranging from automotive, fixed plant to the largest machines in mining, construction, civil, and transport.

HMS Mini Loader will revolutionize how you clean around your belts and other hard to access areas. Eliminates the

need to isolate the belt while cleaning. Eliminates person/belt interaction.

Equipment Placement design and install Mining truck, road truck, bus and light vehicle wash systems with models ranging from manual to fully computer program washing cycles

Reduce costs by installing Auto grease lubrication systems, designed for underground and above ground equipment

Turbo Air pre-cleaners for diesel engine and air intakes

Hydrau-flo fuel delivery systems are Pressure-less fuel shutoff valves for fuel delivery to all types of equipment. These eliminate spills and are more effective than standard systems

Sleipner transport systems for 30T to 550 T shovel and excavators and 120 tonne Dozers

Rotational molded products and safety items Including

trolleys, spill pallets, hole savers, fire hose reels, covers and guards, marine products and water tanks, evaporative water coolers, plastic pallets, aluminium walk ways, cable guards and cable safety products, safety signs, safety barriers, safety flags with LED lights, safety cabinets and a large range of storage solutions.

Equipment Placement also offers for hire, high quality new and used equipment for mining and construction, including service, fuel and water trucks, gen-sets, lighting plants and rubber tired dozers. Additionally we can often source hard-to-find items through our network of associates. We specialize in custom build service vehicles, water delivery vehicles and specialists equipment moving vehicles to suit any requirement of the most demanding situations.

Equipment Placement is the distributor for the Sleipner Transport System in Australasia. The innovative Sleipner is a safer, significantly faster and more cost effective way of

moving excavators than traditional methods.

Equipment Placement is a distributor for JAMA Wheel Handling systems, the JAMA wheel handling unit can meet the most demanding workshops needs, the JAMA system enables the operator to remove wheels then with a quick add on attachment the front strut or rear wheel motor/ final drive can be removed as well. JAMA provides a total solution for all large mining truck driven component maintenance requirements.

Equipment Placement is a distributor for Inter-clean heavy duty vehicle wash systems, the world leaders in fully automated large vehicle wash systems. A wash system can be designed to suit many application including: car, 4wd, truck, bus, fleet, defence, mine and rail applications.
